

PROJECT MANAGEMENT 2021

Project/Event Path to PMP Certification
Organizer Women in Technology, Inc.
Location Virtual via Teams

About the Course

Project management is at the heart of nearly every County Department performance improvement initiative. The reason is clear: it works. Project management education and training are often the first initiatives in a performance improvement effort because training and education are the foundation of a successful culture change initiative and achievement. This curriculum strives to achieve just that.

The curriculum serves to provide County employees opportunities to ensure that project management training is applied back on the job.

Seating is limited. To register, please click [here](#).
