WOMEN IN TECHNOLOGY

LOS ANGELES

Coming Up: Summer Data Science Camp

WRITTEN BY FEI WU

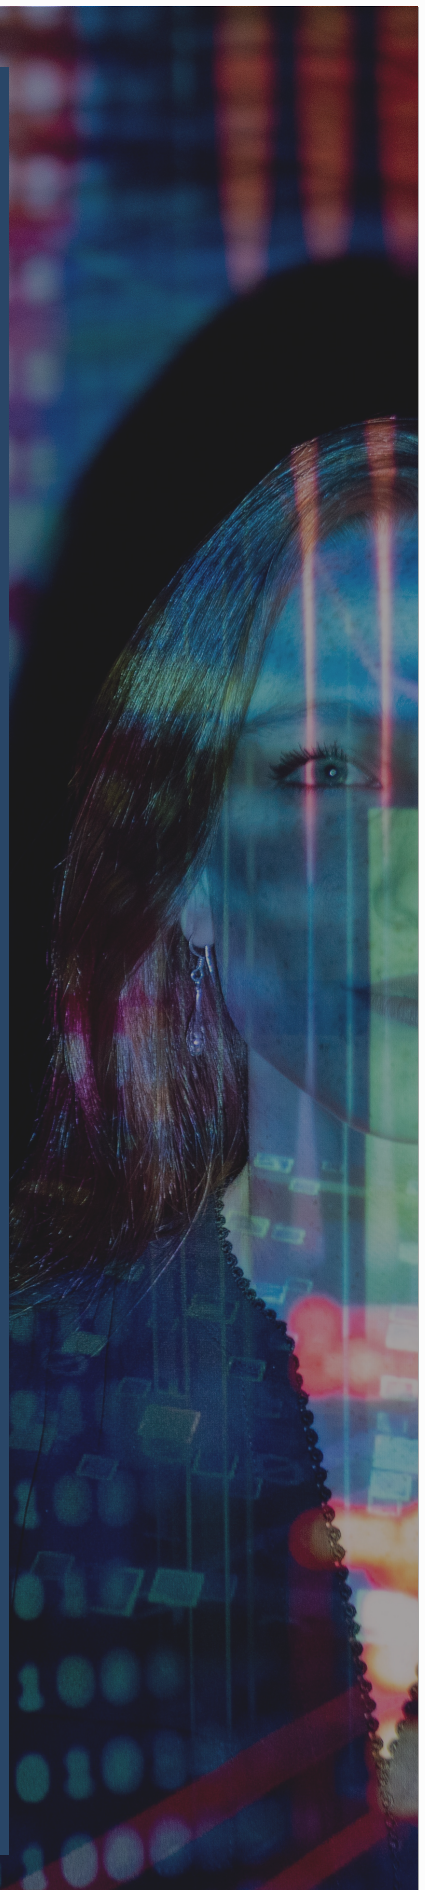

What is data science? What's the big deal? How do we use data to inform practice and policy? What are the tools available for me to use?

Join LA County's first data science workshop and learn about the fundamentals together with WiT|LA, Google Government Cloud, and Women in Data Science@Stanford! No experience in Data Science required.

This 6-session Data Science series will

- 1) Discuss these hot topics at a conceptual level;
- 2) Introduce big data platforms and analytical tools, such as Google BigQuery and GitHub; and
- 3) Start your first data science project (voluntary participation) with guidance from experienced data scientists and peers.

Click [here](#) to register today or check out our [Data Science Webpage](#) for more information!

VOLUNTEERS!*

Join Now!

OUR VOICE. OUR TIME.

WiT|LA sponsored and participated in the 4th Annual Girls to Greatness Teen Summit, on April 30, 2021. The goal of the Summit was to expose 300 Middle and High School girls from EmpowHer Institute, ages 11-18, to a day of empowerment, mentoring, and career opportunities in varying fields, under-represented by women and young teens of color. Read more about the event [here](#).

ACTIVITIES

CURRENTLY ONGOING

PMP Class Series - End August 25th

WiT|LA is currently conducting a Project Management for Government educational series to a cohort of over 30 employees from various County Departments. In effort to develop a versatile County workforce, the series provides best practices, tools, and other resources in the field of project management.

The series is scheduled to conclude in August 2021, but please stay tuned for additional project management educational opportunities in future announcements!

UPCOMING

MENTORSHIP - July 15, 2021

WiT|LA is sponsoring an upcoming Mentoring Series, free of charge, for LA County employees to support women and men in technology roles. You will learn how to seek Mentorship for Self, or offer Mentorship to others. Please join us to hear this insightful dialogue with our distinguished panel of speakers from LA County employees and other private and public sector participants.

SUMMER DATA SCIENCE CAMP - August 2021

Free workshops to learn data science related skills: code in Python & create predictive analytics solution using real datasets. Get a head start and check out Google Cloud.
